NUOC LIFE

LIVE. LOVE. SAVE.

Bottled water generates a worrying amount of plastic that gets piled up and end up in the ocean. As travelers, we got to see it in first hand during our trip to Vietnam, where we truly realized about how bad the plastic problematic is and decided to find a solution.

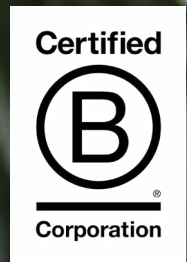

This is how NUOC (water in Vietnamese) was then born back in 2016 in San Sebastian, Basque Country; aiming to offer a sustainable alternative to single-use plastic water bottles: a portable reusable glass bottle. But we knew we could do even more to help, so we started supporting projects that provide access to clean water in developing countries, as well.

NUOC introduces to the world as an honest, curious, idealist but foremost, committed brand, where seeking full happiness and common good is the end goal.
